

After the Revolutions: East-West Trade and Technology Transfer in the 1990s

This volume brings together some of the West's leading experts to reconsider East-West trade and technology transfer policies after the revolutions. Among the issues examined are recent changes in US export control policy, the export control implications of EC 1992, and the future of the Coordinating Committee for Multilateral Export Controls (COCOM) through which the West's strategic embargo of the Soviet Union and Eastern Europe has been formulated for the past 40 years.
