An adventure of both science-fiction and fantasy - one of the great love stories - this is William Hope Hodgson's masterpiece, rewritten for the modern listener. Penned in 1912, *The Night Land* is considered by many to be a work of genius, but one written in a difficult, archaic style that listeners often find impenetrable. As a labor of love, James Stoddard has rewritten Hodgson's book to bring it to a wider audience. The story opens in the 19th century but quickly moves to the far future, where the sun has gone out, leaving the world in a darkness broken only by strange lights and mysterious fires. Over the ages, monsters and evil forces have descended to the Earth, compelling the surviving humans to take refuge in a great pyramid of imperishable metal built in a miles-deep chasm. The monsters surround the pyramid in a perpetual siege lasting for eons, waiting for the moment when its defenses will fail. But one man, born out of his time, must leave the pyramid to seek his long-lost love through all the perils of the Night Land.
